**Pairing AVATON IoT  
to a RADEFY BLE  
Lock or  
BLE Keypad**

## Pairing the AVATON IoT Smart device with your RADEFY BLE Smart Lock or Keypad

- A. Before you begin the pairing process of any RADEFY BLE Lock or Keypad, please make sure that you check the following:
  - a. Install the batteries in the lock
  - b. Turn the Bluetooth Lock **ON**
  - c. Check that it is ready
  - d. Make sure that the BLE Smart Lock or Keypad are within 10m from the AVATON IoT Smart Device.
- B. Sign in to your Centurion Dashboard,
- C. Go to the “Devices” Tab
- D. Press the “Control” button of the location you would like to pair a BLE Lock or Keypad.
- E. Press the “Scan Device” button on the top left-hand corner of your screen.
- F. Select the Mac Address of the BLE Lock or Bluetooth Keypad you would like to pair with your AVATON IoT Smart Device.
- G. Press “SAVE”
- H. You are done.

Your BLE Lock or Bluetooth Keypad has been paired with the AVATON IoT Smart Device, assigned to that Location (Room, BnB, Dorm).
